Skills

Tech

React, TypeScript, Testing Libraries (Jest, RTL), WebPack, Git, All CSS frameworks.

Interdisciplinary

Agile, UX, Marketing, and Leadership. Bilingual (ESP, ENG) and quick learner.

Professional Experience

Software Engineer, *Mint IT Media*

2023/05 – present | Tijuana/San Diego

- Spearheaded the project's relaunch with a strategic focus on offering Web engineering services tailored for creative agencies.
- Engineered bespoke solutions on various platforms, including Next.js, Shopify, WordPress, and Cargo, meticulously aligning with each client's unique requirements.
- Engage in collaborative hobby projects with colleagues, dedicated to maintaining a cutting-edge skill set and readiness for larger opportunities in the dynamic and ever-evolving landscape.

Senior Front End Developer, *Nebulosa Studio*

2022/09 – 2023/05 | Vancouver, Canada

- Developed websites integrating WordPress' ACF modules and Next JS to build high-end custom websites.
- Led the initiative to implement a flexible UI component library to optimize code reusability and improve performance and accessibility standards.
- Guided the team in implementing practices to improve the development process. This included UI breakdown revisions, ticket grooming, and onboarding into visual testing platforms.

Front End Software Engineer, *Intuit*

2016 – 2021 | San Diego, United States

Joined the Marketing team's transformative initiative to reimagine and rebuild the Marketing Website as a feature-full dynamic platform for marketing professionals. In this pivotal role, key achievements included:

- Developed a comprehensive page creation CMS, leveraging the WordPress UI to empower marketers with greater autonomy.
- Led the migration of the web application from Handlebars JS to React, improving performance, accessibility, test coverage, and developer experience.
- Built and utilized a Centralized Component Library which provided branding updates, and ensured accessibility standards; all seamlessly integrated for enhanced efficiency.
- Successfully onboarded experiences onto an audience testing platform, ensuring optimization through user-centric testing.

Subsequently, I joined the Authentication team, leading the effort to refactor their widgets to onboard onto the Component Library, gaining branding and accessibility benefits, and streamlining efficiency.

Project Manager/Front End Developer, *Mint IT Media*

2009 – 2016 | Tijuana/SD

- Established Mint IT Media in 2009, providing specialized Website and System development services for companies in North Western Mexico and Southern California.
- Balanced roles by actively engaging in front-end development using HTML, CSS, and jQuery, while concurrently managing clients, colleagues, and providers.

Education

MBA, *CETYS University* 

2015 | Tijuana, Mexico

UX/Media Engineering, *CETYS University* 

2009 | Tijuana, Mexico
